

I choose to take this class to pursue my interest in graphic design. Ever since I took this class I became more sure of myself. I love learning photoshop, illustrator, animate, etc. This summer course is fast-paced, and was even fratrating at times. Although I had to pick up things quickly, it was so much fun. Everything just clicked for me. I'm looking forward to learn more and creating tons of projects.

I wanted to incoparate my creature from illustrator for this animation. I thought up a scvenario that would be simple to animate. Then it hit me. My idea was to create a point of view persecptive of someone looking through a submarine window. Then suddenly my creature appears!

Animate
